Forecast for Friday 04 Aug 2023

Weather: Low cloud at first and some early drizzle, but cloud will lift and break during the morning to allow for bright or sunny spells during the afternoon. Showers are likely throughout the morning, perhaps becoming heavy at times, with a low risk of thunder. Higher cloud during the late afternoon will thicken from the west during the evening, with rain arriving in the early hours of the morning.

Chance of cloud-free hill tops above 600m: 20% becoming 90%

Low Cloud and visibility: Areas of cloud base 300-400m at first, lifting towards 600m by midday, then clearing all summits during the afternoon and breaking up slightly. Lower cloud will then increase again overnight, becoming gradually lower and more extensive. Visibility very poor in any cloud covering hills and in any early drizzle, then generally very good for the rest of the day, but poor in showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Moderate to High levels of UV despite some cloud, so sun protection is recommended. Note the low risk of thundery showers.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Fri 04 Aug 2023	4mm	20mm	24mm

Forecast for Saturday 05 Aug 2023

Weather: Cloudy with persistent rain for most of the day, turning heavy at times, and with a low risk of thunder within heavier bursts. Cloud may begin to break into the evening, with some drier spells developing, but the risk of showers will continue.

Maximum wind: Easterly becoming northerly 15-20 mph gusting 30-35 mph

Chance of cloud-free hill tops above 600m: 10%

Low Cloud and visibility: Extensive cloud base 300m or below for most of the day. Very poor visibility in cloud covering hills and in heavy rain. Cloud perhaps beginning to break early evening, but likely remaining over higher hills.

Temperature: **Valleys:** Plus 12 Celsius
At 600m: Plus 9 Celsius
Freezing level: Above the summits.
